

T.I. no.: 2023-20 Updated: -	Topic: Software V5.6.4 Release Notes
--	---

Date: 30.11.2023	Priority	Need for action
Affected machines: SOUL, SOUL C, SKYE, SCS	<input type="checkbox"/> High	<input type="checkbox"/> As soon as possible
From serial number: -	<input checked="" type="checkbox"/> Medium	<input checked="" type="checkbox"/> On next visit to the machine
Start date: immediately	<input type="checkbox"/> Low	<input type="checkbox"/> FYI only

INFORMATION ON SOFTWARE UPDATE

Errors have been eliminated with the new software update V5.6.4. The platform software optimises and replaces software version V4.54.6.

Overview of the most important new functions

- The management UI can be displayed with variable resolution for different screen sizes.
- The name of the database backup file can now be customised.
- Defined assets of a single media package are displayed.
 - > A start button per imported media package is available under **Management UI > Service > Media Manager**.
 - > The button for opening the media package editor for all imported media packages has been removed.
- In Staff mode, the icons on the left bar can be replaced with the media package.
- Change of the variable bypass configuration
 - > A **Starts at** water volume in ml can be defined after which dispensing takes place through the bypass.
- H&C Additional Cooling possible for coffee steps
- No instruction for descaling in machines without a descaling option
- New language Italian has been integrated.
- SOUL C: GUI animation specially for SOUL C has been added.
- SOUL C: For now, the cup sensor on the SOUL C only has presence detection.
 - > In the settings for the operating mode of the Soul C, there is now a **Cup Detection Mode** combination field with the **Height detection** and **Presence only** options.
- SKYE: Own default recipes for Pure Foam
- SCS: Software of the SCS is now a legacy version and no longer part of the platform software.
- ProCare: Motor control for the Best Foam mixer optimised during application time.
- ProCare: Setting range for application times has been increased.
- ProCare: No cleaning product is wasted while it is changed.

Corrections/Troubleshooting

- Cancelled beverages from the preselection no longer appear in the statistics.
- The modification screen is now displayed even if only one optional ingredient is configured.
- Cleaning processes are started according to the cleaning schedule.
- Behaviour when switching off after cleaning has been improved.
- Import of predefined database settings possible
- Media packages can be saved in the media package editor.
- Screens for cooling and draining are now displayed on the entire screen of the panel. This means that operating errors are no longer possible.
- False flow meter errors with high system load eliminated
- Duplicates in error statistics eliminated
- Automatic switch-off after cleaning for machines with an internal tank works as expected.
- Crash in Guest mode after dispensing a double beverage has been fixed.
- SOUL C: The **Enter Service Menu** entry is now available in the Staff mode operating screen.
- SKYE: Pure Foam beverage completion has been simplified.
- ProCare: During ProCare maintenance, the correct text is now displayed for the selected option.
- ProCare: Cleaning can now be started with the red pouch smiley.
