Title: Hose boiler pump

Issue:

Pump hose is coming loose from the boiler.

Status:

Supplier is involved to implement a final solution.

Advised solution for park in operation:

Because the diameter from the hose is very small and difficult to mount, we advise to use another hose.

Instruction:

Drain the boiler.

Remove a part of the boiler insulation to have a better view on the hose connection.

Disconnect the brown hose.

Mount a new hose (4,5 cm) as far as possible on the boiler.

Part number:

55085049 HOSE $\varnothing 13/\varnothing 9$

Or cut a 4,5 cm from the drain hose.

Mount a clip for extra fixation

Part number:

55115147 HOSE CLAMB AUTOLOCK

15,6 MM

Mount an angle piece
Part number:
55102011 ELBOW FOR HOSE $\varnothing 9/\varnothing 13$

Shorten the brown hose to 23 cm
and connect to the angle piece, be
sure the spring is at the correct
position.
