

TECHNICAL INFORMATION

Range H&C - HO.RE.CA.	Model KREA ES/FB - 9100	N° T.I. 01_2016
Serial Number 60211125	Subject NEW SCRAPER SPRING FOR Z4000 ES/FB	N° Claim -

With the aim to improve our equipment, starting from S/N **60211125**, it has been introduced a new **scraper spring for Z4000 ES/FB** (spare code "Coffee Assembly **Z4000 ES/FB**": **258730**).

Modification: the spring has two spirals that work on both scraper sides. The second spiral distributes the scaper loads (*pre-modification* spring: one spiral).

So the new spring guarantees a better scaper alignment with upper piston and consequently a better cleaning of the filter compared with the existing spring.

The **pre-modification** spring spare code is: **256747**

The **new spring** spare code is: **260144**
Important note: it can be retrofit on older brewers
