---	--------------------------------------

<b>Date:</b> 24.05.2018	<b>Priority</b>	<b>Need for action</b>
<b>Affected machines:</b> SCA P BF	High	As soon as possible
<b>From serial number:</b> 1821../	Medium	On next visit to the machine
<b>As of date:</b> -	X Low	X FYI only

## NEW FUNCTIONS AND IMPROVEMENTS

The following is an overview of the new functions and fixed errors:

### New functions:

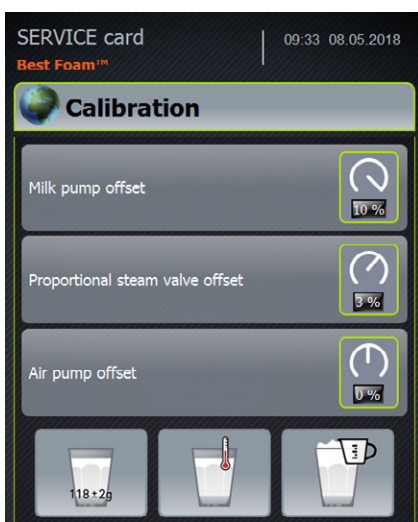

- Direct beverage dispensing with Best Foam calibration.

### Improvements

- All selected beverages are visually highlighted if pre-selection is active.
- Partially faulty transfer of logs onto the UBS stick fixed.
- Displayed cleaning time with active steam boiler rinsing corrected.
- Article numbers of the beverages are displayed in the statistics and in the price list.
- After beverage supply, the standard beverage page is always displayed.
- Faulty beverage supply with several strokes without re-pressing fixed.
- Beverage names of moved, exchanged or deleted beverages are displayed correctly even after changing the language.
- Beverage supply via the external button when "DECAF" pre-selection is activated works correctly.
- Brewing unit always moves into the correct position.
- The telemetry module is displayed when the machine goes into standby mode.
- The "Grinder blocked" message is displayed in the telemetry portal.
- Communication with telemetry reduced when starting up the machine.
- A new [Vend on Credit] parameter in the MDB configuration also enables beverage supply when no balance exists. This is needed if billing is done via a network.

### Best Foam calibration

With version 1.81, it is possible to supply test beverages directly in the Best Foam calibration. The recipes are permanently saved and do not have to be created again. They cannot be adjusted.

- Quantity
- Temperature
- Volumes
