NEW MAINS WATER SUPPLY

The mains water supply of the SCP (072838) has been revised. The pressure valve (33.2269.3000) does not always work consistently and is being replaced by an inline controller.

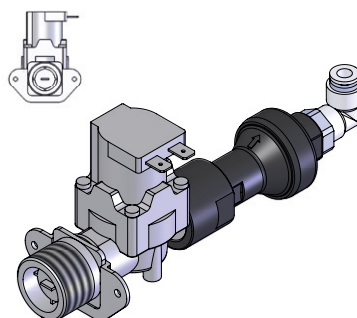

Old pressure valve (33.2269.3000)

New inline controller (072838)

The module is only available as a complete unit since it is stored in a pre-assembled state. The new module can be retrofitted. To do so, order part no. 072838 and exchange the complete module.
