## STANDARD 2/2-WAY BEST FOAM VALVE

A standard 2/2-way valve (33.2273.6000) will be used for the Best Foam milk system from now on. The new valve will prevent temperature fluctuations in the milk.

Another restrictor will be used on the output side of the valve depending on the boiler configuration:

- 1.8 mm 2kW boiler
- 2.4 mm 3kW boiler

The new valve is also changing the software configuration. You can find a more detailed description in the TI 2019-04 (SC Soul) software 4.2.5.

Information on retrofitting the valve in the field will follow at a later time.
