<b>From serial number:</b> All	X Medium	X On next visit to the machine
<b>As of date:</b> All	Low	FYI only

## DISINFECTION OF TOUCH SCREEN AND OPERATING ELEMENTS

**NOTE**  
All measures required for commissioning and decommissioning are described in the operating instructions of the respective coffee machine.

**IMPORTANT**  
The plastic which borders the touch screen and operating elements is **not** resistant to disinfectant.  
If disinfectant runs into the fine cracks or gaps or if disinfectant is heated to high temperatures, it could cause machine damage.

### Disinfection

To disinfect the touch screen and the operating elements:

1. Get a clean, dry cloth and spray with disinfectant.
2. With the cloth, clean the touch screen and operating elements.
3. Wait until the disinfectant has evaporated before dispensing beverages.
