---	----------------------------

Date: 04.06.2020	Priority	Need for action
Affected machines: SCSoul, SPCC/SPCE	High	As soon as possible
From serial number: 20 19 xxx xxx	Medium	On next visit to the machine
As of date: 08.05.2020	x Low	x FYI only

NEW GENERATION OF GRINDER V3.0

INTRODUCTION INTO THE SERIES FROM CALENDAR WEEK 19/2020

- 1** Finger protection (072260) without threaded profile
- 2** Motor (073650) with shafting

- After long-term test, involving multiple grinders and variety of coffee beans, it was established that we can achieve a more consistent dispensing behaviour when a finger protection without threading is applied.
- The trade-off is a slightly lower output in gram per second, which depends on the grind level setting. A performance reduction towards the range of the V1.0 grinder is expected.

For Schaerer, coffee competence is one of the core brand values. For this reason, we place quality above pure performance and offer our customers consistent quality.
