NEW FUNCTIONS AND IMPROVEMENTS IN 3.20

The software version 3.20 released on 18.11.2016 and installed on Machines with the s.n. 1648.../
The following is an overview of the new functions and fixed errors:

New functions:

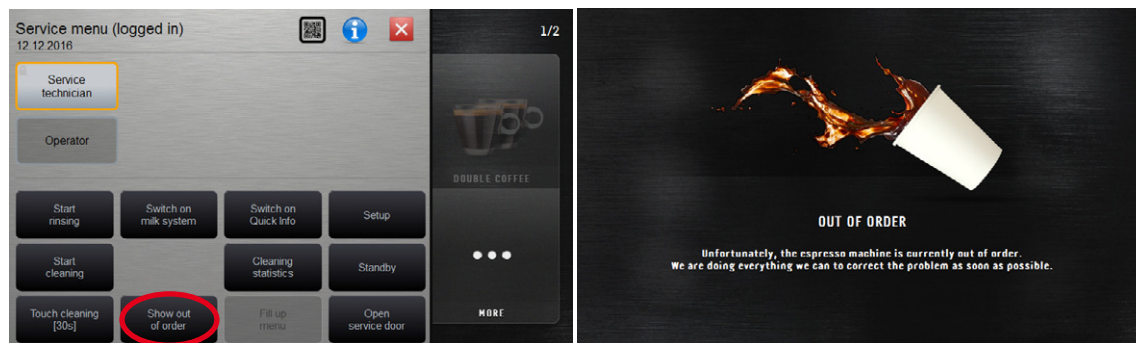

- "Out of order" screen added. (Refer to page 2)
- A warning is shown when the coin changer only contains a small amount of change.
- New "Jacobs" and "No brand" brands added.
- Other languages added to GUI (EN, NL, DA, FR, DE, NO, SV).
- JDE beverage ID is displayed via telemetry.
- The user can extend the time-out by touching the display in the "Place mugs" screen.

Adapted functions and improvements

- The standard recipes are automatically adapted to one grinder for machines with only one grinder.
- Extended selection options of the waste water system during commissioning. (Refer to page 2)
- Software update is not longer directly started when the USB stick is inserted.
The update is started via the Service menu or when the machine is restarted.
- "Press & hold" hot water dispensing only works without a payment system.
If a payment system is activated, the defined amount (beverage setting) is output.
- The MDB communication is stopped as soon as the machine is blocked.
- Display calibration is no longer started by pressing and holding down the Service button. (Only via the Service menu)
- Product price is no longer visible if the payment system is deactivated.
- "Place mugs" screen adapted:
 - > Brand-specific magnifying glass
 - > Cafe Noir mug image replaced
 - > Brand-neutral teacup
- The blend selection depends on the selected brand.
- Beverage selection is no longer available.
- Prime functions not available on the Barista One are hidden.
- The "Full restore" function works correctly in the bootloader.
- Beans for the flat white recipe have been changed to "Intense black".
- Ristretto recipe can be used without problems.
- Red bar is higher in the event of an error message.

"Out of order" screen

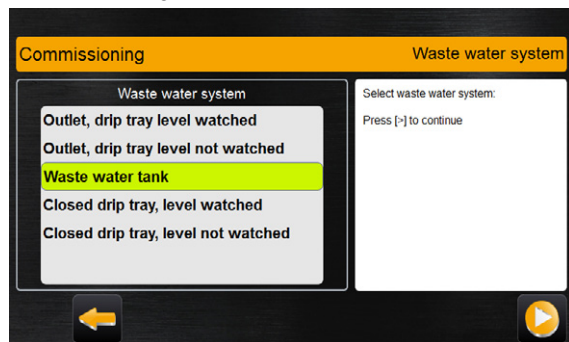

In version 3.20, the "Out of order" screen can be displayed via the Service menu and the "Show out of order" button. This screen also appears when a fatal error occurs (e.g. overcurrent).

MDB interface communication stops as soon as the "Out of order" screen is active.

Extended selection options of the waste water system during commissioning.

The selection options for setting the waste water system have been extended to correctly define level monitoring during commissioning.

- Outlet, drip tray level monitored
- Outlet, drip tray level not monitored
- Waste water tank
- Closed drip tray, level monitored
- Closed drip tray, level not monitored

NEW FUNCTIONS AND IMPROVEMENTS IN 3.30

The software version 3.30 released on 21.12.2016 and installed on Machines with the s.n. 1651.../
The following is an overview of the new functions and fixed errors:

New functions:

- New "Creamy chocolate" recipe added.
- Czech and Hungarian have been added to the languages.

Improvements:

- Software crash when selecting beverage with only one product page repaired. The "Next" button can be deleted without the error recurring.
- Danish language revised
- Symbol and bean selection test have been adapted for the "Piazza D'oro".
